Note:

Upscaled artwork resolution ranges from 1500px to 5000px (for both sides; up to ~7000px for one side).

I tried my best to enhance most artworks, yet some of them remained untouched. The reason for this is that they contain poor-quality complex objects or body parts—faces in particular—that cannot be correctly upscaled (e.g., 'Memrise'). [Contact me](#) if you have any ideas on how to remedy the situation, that'd be great, thanks.
